

Home Series P7 & P7 Plus

Your putting studio at home

PUTTVIEW

*"It's a fantastic bridge between
practice and play"*

Peter Finch, Professional Golfer

Your private putting studio, all in one system

Transform your home into an immersive, interactive putting studio. Get the best of the original PuttView features suited for every golfer. Discover even more of the PuttView world by choosing the P7 Plus.

Two options to fulfill your needs

PuttView P7

The basic P7 is designed for home users looking to add more fun to their putting practice. Improve your skills in the morning, then invite friends over for an evening of interactive games and entertainment.

PuttView P7 Plus

Get everything you love about the P7, now with a professional edge. Customize your practice sessions, analyze your performance in-depth, and see rapid improvement. If you're an ambitious golfer or aspiring pro, this setup is made for you!

PUTTVIEW

Designed to upgrade your home

Keeping it simple while maintaining high-quality standards is the key to our Home Series. Every layer of the self-assembly unit is specifically designed to bring the best possible putting experience into your home.

A solid base for your success

The base layer of the Home Series compensates irregularities in the floor or the surface it is placed on. It is a vital element for an accurate calibration of your PuttView system.

Rely on the trustful foundation

This high-tech Styrofoam layer contours to your putting green and is placed on top of the base. Its puzzle-like design makes it easy to assemble at home. Additionally, the material is extremely durable and self-repairing, meaning that even if you step on a ball, the Styrofoam will return to its original form.

Perfect putting conditions

Our Home Series blends seamlessly into your home, like a nice piece of furniture, while providing true tournament conditions. The turf is easy to maintain and runs at 11 stimp, creating the ideal setting to take your putting to the next level.

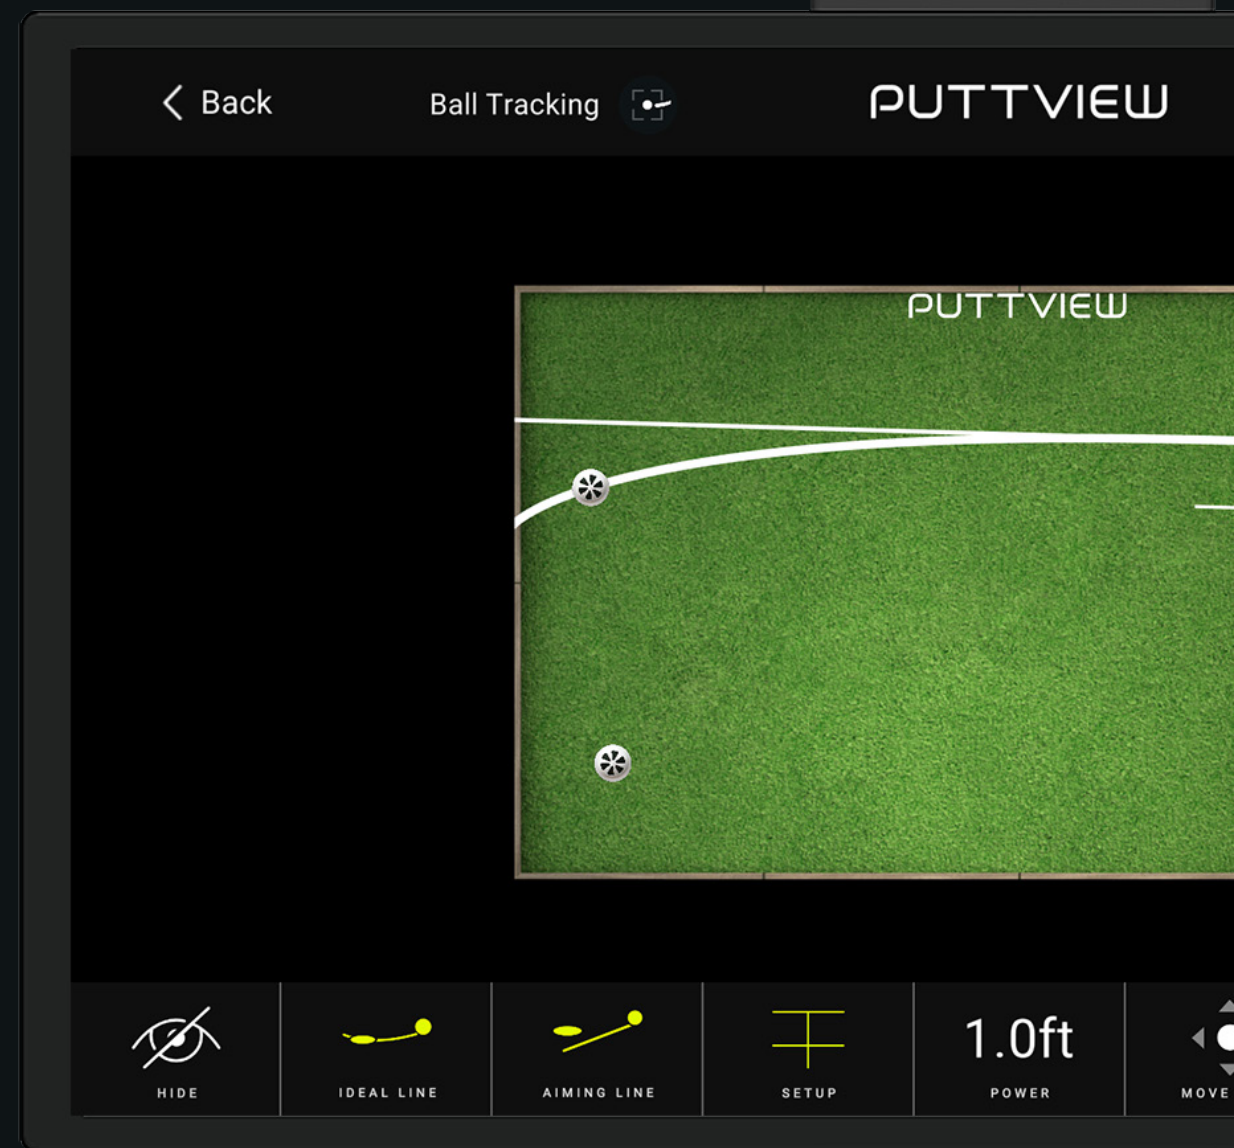

PUTTVIEW

Everything in place

The tower cabinet houses the electronic components of PuttView, neatly concealed behind a sleek, modern mesh material that blends seamlessly with the rest of the PuttView system.

Just one touch away

The system includes a touchscreen for the P7 model or a tablet for the P7 Plus, each serving as your remote control for PuttView. With a simple touch, you can choose from various practice scenarios, adjust the visuals on the green, and switch between holes.

Bring your imagination to life

A projector displays all data points of any chosen putt directly onto the green, making elements like the Ideal Line or Aiming Line visible without any extra gear. The Ball Tracking system, positioned above the projector, adds an interactive layer to your PuttView experience, allowing you to see the ball's actual path in real-time as it aligns with your intended putt.

Track your performance

PuttView's Ball Tracking feature helps you analyze your tendencies with a comprehensive dashboard. Create a session to track each ball played during practice. Understanding where your misses come from will make your practice sessions more effective over time.

Drills, random putts and challenges

Sometimes, it's hard to know where to start improving. Our predefined practice drills help you get past that hurdle. Repeat the exercises regularly and track your progress.

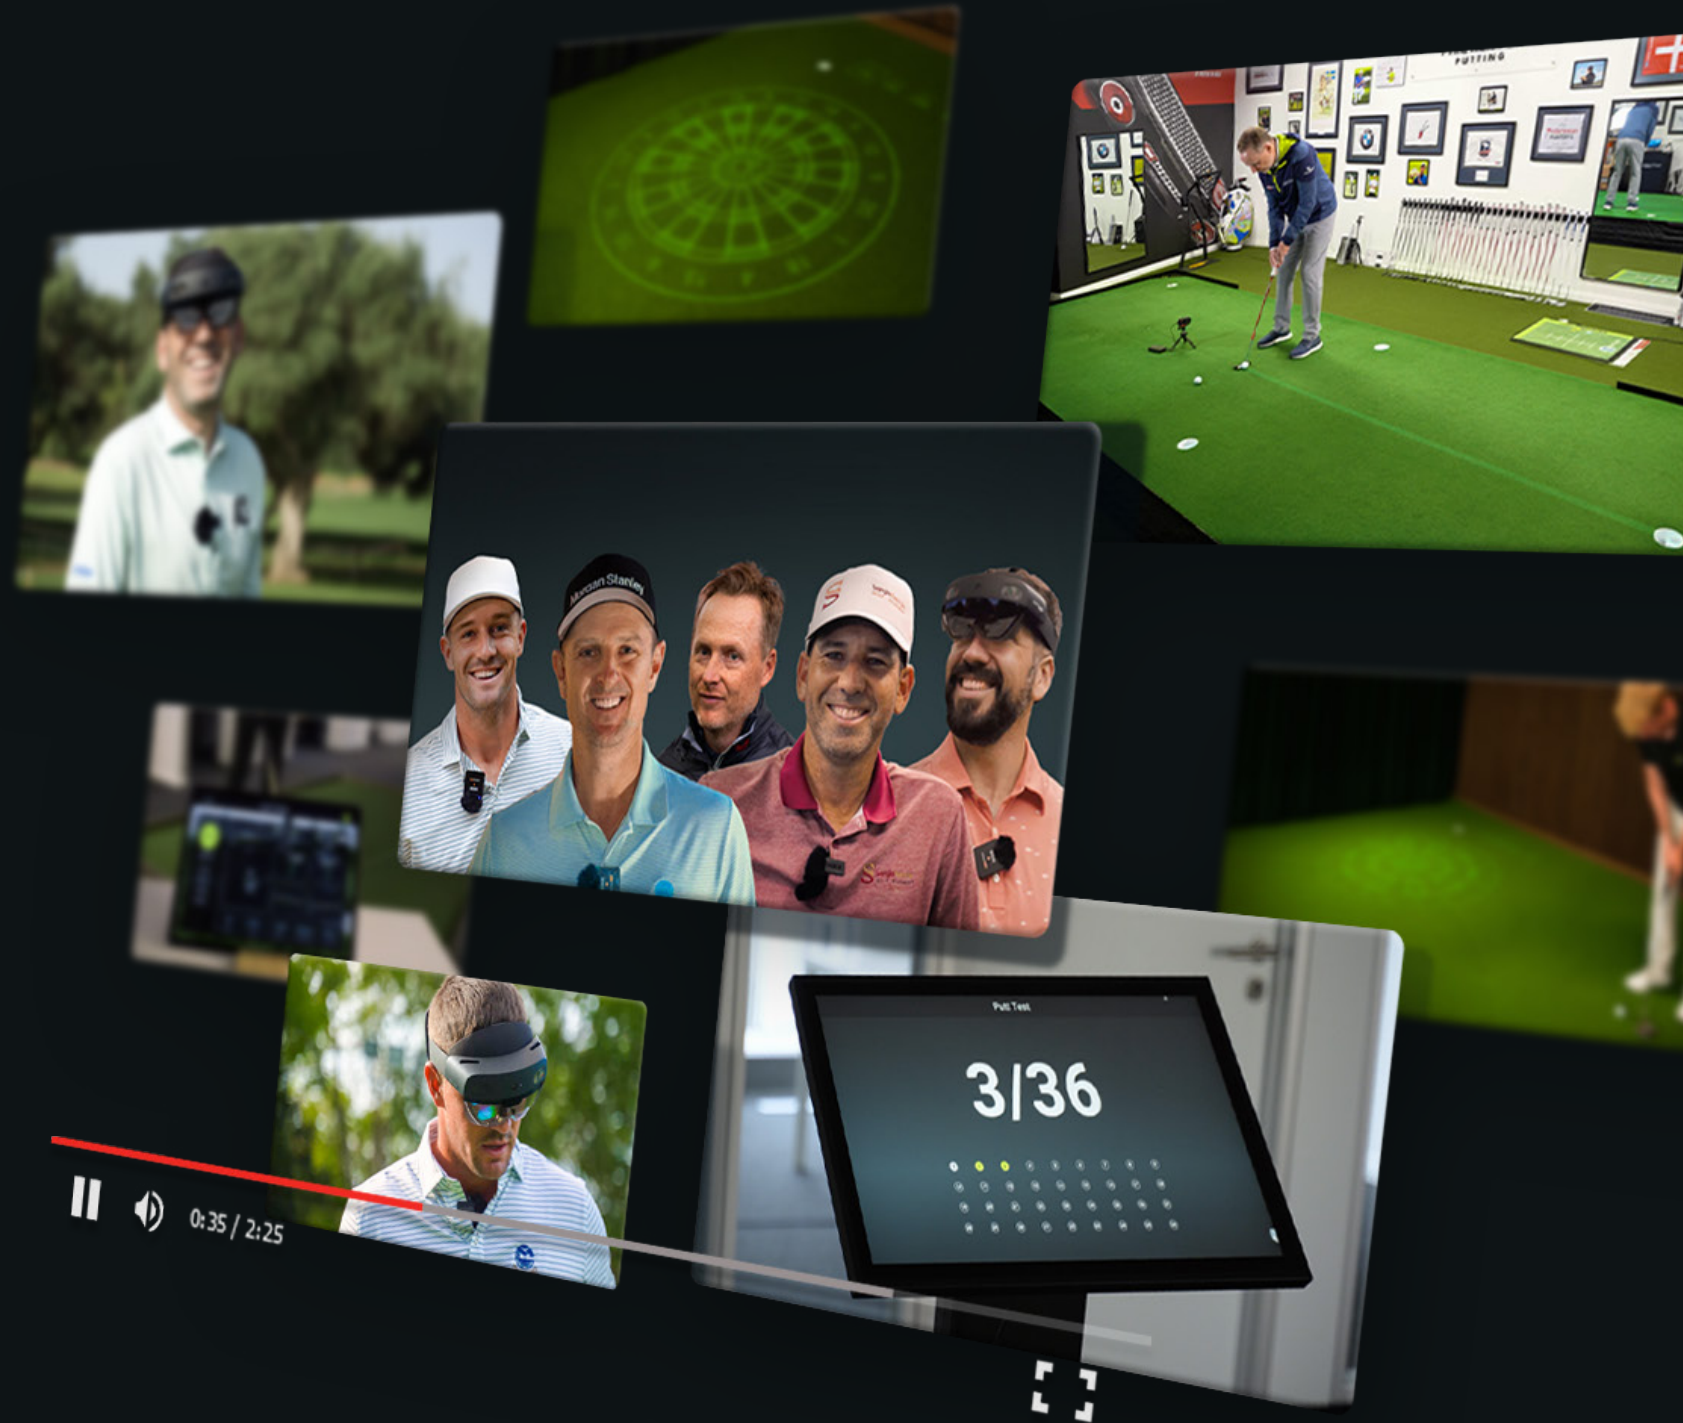

For family & friends

Invite your friends and turn the Home Series into an interactive gaming board. Choose from a variety of multiplayer games like Putt Pong and Tic-Tac-Toe, or test your skills with drills like Challenge Zone. Pick your favorite and get ready for a fun and engaging evening.

Enter the world of PuttView

We regularly bring you valuable insights into the world of putting. Learn from players and coaches at the top of the game, watch and download drills to maximize your PuttView experience, and dive deep into all things putting through our monthly blog. Stay up-to-date by subscribing to our social media channels and newsletter.

Green design

With the Home Series, we've created a unique green design that offers every possible putting option within the crucial 10-foot range. You can practice any putting scenario you'd encounter on a real green, all within a compact space.

- ① 3% Severe Slope
- ② 0,5% Mild Slope
- ③ 2% Moderate Slope

*Green design for P7 and P7 Plus is the same.

Unlimited possibilities

Move freely around the green!
Choose any starting position, and
PuttView will instantly calculate
your putt. Every break, distance,
and target is possible, allowing you
to practice exactly what you need.
